FOREWORD

The Georgia Statistical Abstract, which is published biennially, brings together in one reference volume the most pertinent information available about the state of Georgia.

Although the orientation of the Abstract is primarily economic -- with special emphasis upon economic resources -- other community and area resources are encompassed in the Government section and in the Education and Law Enforcement sections. Several parts of this Abstract are revised and expanded, particularly the Population and Vital Statistics sections, the chapter on Income, Gross State Product, and Wealth, and the chapter on Law Enforcement.

Special acknowledgement is made of the efforts of the following persons who contributed to this major undertaking: Suzanne Lindsay, research coordinator, for extensive revision of major sections; Marie McGrath Libbey, data collection specialist, for tracking down elusive unpublished sources; Al Newton, undergraduate assistant, for verifying all of the data; and Mary Evans, administrative secretary, for computer typesetting the Abstract in its entirety.

Since most of the data in the Abstract are taken from sources outside the Division, the responsibility for the accuracy and limitations of the original data belongs to the original sources. For the selection of the data and their reproduction, the Division of Research accepts the responsibility.

[a] Personal income = net earnings plus property income and transfer payments. Net earnings = wages and salaries, proprietors' income, and other labor income, minus social insurance contributions and plus a residence adjustment. Estimates are based on the 1972 SIC.

[b] Includes dividends, interest and rent.

[c] Personal contributions for social insurance are implicitly included in the estimates of labor and proprietors' income. However, they are not included in personal income and so are subtracted from earnings in the computation of personal income.

Note: As of January 1988, the Consumer Price Index standard reference is 1982-84 = 100. The previous reference base was 1967 = 100.

[a] Figures for each year have been adjusted for price-level changes by division of each figure by the annual average Consumer Price Index, All Urban Consumers, U.S. city average, all items, (1982-84 = 100) for the particular year.

[b] Personal income = net earnings plus property income and transfer payments. Net earnings = wages and salaries, proprietors' income, and other labor income, minus social insurance contributions and plus a residence adjustment. Estimates are based on the 1972 SIC.

[c] Includes dividends, interest and rent.

[d] Personal contributions for social insurance are implicitly included in the estimates of labor and proprietors' income. However, they are not included in personal income and so are subtracted from earnings in the computation of personal income.

[a] The total personal income of an area reflects all income received by, or on behalf of, persons (including nonprofit institutions) resident in that area, less personal contribution for social insurance and without deduction of personal taxes.

[b] Net earnings by place of residence; derived by subtracting personal contributions for social insurance from total earnings by place of work, and adding a residence adjustment factor.

[c] Includes rental income and residence adjustment for farm proprietors and capital consumption adjustment for rental income of persons.

[d] Includes payments by government and business to individuals, and payments to nonprofit institutions. See Tables 19.201 and 19.203 for detail.

[a] Includes total cash receipts and other income of individual proprietors and corporate farms.

[b] Represents total net income of individual proprietors and corporate farms; derived by subtracting production expenses from gross farm income and adding the value of inventory change.

[c] Derived by subtracting corporate farm income from net farm income, and adding statistical adjustment factor.

[d] Derived by adding farm labor income (wages and salaries, perquisites, and other income) to net farm proprietors' income.

(L) Less than $50,000. Estimates are included in totals.

[a] Industry totals based on allocation of sales and use tax revenues to individual industries by Georgia Department of Revenue.

[b] Total taxable sales include the value of all taxable items, including motor fuel, as reported by firms selling or acquiring them, plus penalties and interest collected. The category includes all listed industries; industry estimates may not add to the total because of rounding and/or incomplete allocation of source data.

[c] Total retail sales include the industries of food, apparel, general merchandise, automotive, furniture, and miscellaneous.
